

The installation of a Water Supply System, Matsanjeni North, Lubombo Region (E 1,573,606.65)

- In 2017, the Embassy of Japan, through the GGP programme, collaborated with Thirst Project, to install a water supply system in Matsanjeni North, Lubombo Region.
- Before, the community of Matsanjeni North had to walk over 5km to collect water from their nearest source. To make matters worse, there was also a drought, and that led to a poor harvest and the death of livestock.

The installation of a Water Supply System, Matsanjeni North, Lubombo Region (E 1,573,606.65)

- The Embassy of Japan stepped in, and since the completion of the project the water supply system benefits over 1,500 Matsanjeni North residents who now have access to clean and safe water at a distance of less than 200m from their homes.

The System of Water Supply
