## Development Assistant Plan in the Republic of Namibia by the Government of Japan

As of April 2013

ı	Basic Policy of	
	Assistance	Realizing of Sutainable Development and Correction of Economic Disparity

Priority Areas 1	Contribution to impr	ovement of living standard and reduc	ction of poverty in rural area									
	The current situation and problem: The Republic of Namibia with 0.58 Geni coefficients in 2012 is one of the economical gap countries because almost all of residents in northern Namibia, accounting for approximately two-third of the population of Namibia has a small income. While the Government of Namibia being sound financing has tried to proceed to open rural branch of the Government and to maintenance small scale infrastructure by development budget, rural development measures for local products and agriculture have not always been advanced sufficiently due to lack of administrative ability and frequent flood and draught. Moreover, while the Government of Namibia spends about 20% of the national budget for education and health area, there are some problems in the northern areas mainly due to lack of quality of education (quality of teachers) and insufficient measure against maternity health and infectious diseases like tuberculosis and HIV.  A course of action to development assignment: To conduct "The One Region One Initiative in Namibia" and "Agricult Government of Namibia tackles for improvement of poverty and low income of the resident, the Government of Japan tries to train the relating people who shoulders policy enforcement by training scheme and dispatcle experts and tries to improve administrative service in the social service (basic education and health) by strategically committing volunteer scheme. In the educatin and helath area, the assistance will be conducted by Japan's Global Health Policy and Japan's Education Cooperation Policy 2011-2015									nd low income of the resident, the nent by training scheme and dispatch of ion and health) by strategically
